</table>
STAGE ONE INSTRUCTIONS

1. Remove the vacuum slide from the carbs. Remove the stock needles & spacers, noting the order of assembly. Using the DD #30 slide drill provided, drill your slide lift holes (Fig. A), the picture may not show your slide exactly. Drill your existing slide lift holes only. Do not drill any new holes and do not drill the needle hole.

2. Install the Dynojet needles on groove #2, using all stock spacers (Fig. A). Install the Dynojet washer above the E-clip.

3. Remove the main jet and replace with the Dynojet main jets provided. Use the DJ110 main jets with stock exhaust pipe, or use the DJ114 main jets with aftermarket header or slip-on with high flowing baffles. Be sure that the jets you are changing are the main jets.

4. Locate the fuel mixture screw plug (Fig. B). If you see a screw, proceed to the adjusting procedure. Using the DD #5/32 drill provided, carefully drill thru the plugs. Note: the mixture screws are directly underneath the plug, be ready to pull back on the drill the instant you break thru. Use screw provided to secure and remove the plug. Carefully turn mixture screw clockwise until seated, then back out 3 turns.

STAGE TWO INSTRUCTIONS

1. Remove the vacuum slide from the carbs. Remove the stock needles & spacers, noting the order of assembly. Using the slide drill provided, DD #30 drill your slide lift holes (Fig. A), the picture may not show your slide exactly. Drill your existing slide lift holes only, do not drill any new holes and do not drill the needle hole.

2. Install the Dynojet needles on groove #2, using all stock spacers (Fig. A). Install the Dynojet washer above the E-clip.

3. Remove the main jet and replace with the Dynojet main jets provided. Use the DJ118 main jets with stock exhaust pipe, or use the DJ122 main jets with aftermarket header or slip-on with high flowing baffles. Be sure that the jets you are changing are the main jets.

4. Locate the fuel mixture screw plug (Fig. B). If you see a screw, proceed to the adjusting procedure. Using the DD #5/32 drill provided, carefully drill thru the plugs. Note: the mixture screws are directly underneath the plug, be ready to pull back on the drill the instant you break thru. Use screw provided to secure and remove the plug. Carefully turn mixture screw clockwise until seated, then back out 3 turns.
