WHILE INSTALLING YOUR DYNOJET KIT

1153HA.001
High Altitude Only
1993-95 Honda CBR1000

Stage 1
For mildly tuned machines using the stock airbox, with stock or K&N filter. May also be used with a good aftermarket exhaust system
K&N filter #HA-1087

4 Main Jets DJ110
4 Main Jets DJ114
4 Fuel Needles DNO110
4 Adjusting Washers DW0001
4 E-Clips DE0001
4 Slide Springs DSP007
1 Idle Adjustment Tool DT009

This graph shows a typical gain with a Dynojet jet kit.
STAGE ONE INSTRUCTIONS

1. Remove the vacuum slide from the carbs. Remove the spring from slide. Thread one of the slide cover screws into the center of the needle retainer (Fig. A) and pull up gently. Remove the stock needles & spacers, noting the order of assembly (Fig. B).

2. Install the Dynojet needles on groove #1, using all stock spacers (Fig. B). Install the Dynojet washers above the E-clip. Install the stock spring retainers with the Dynojet springs.

3. Remove the stock main jets and replace with Dynojet main jets provided. If you are running the stock exhaust use the DJ110 main jets, if you are running an aftermarket header or slip-on with a high flowing baffle, use the DJ114 main jets. Be sure that the jets you are changing are the main jets.

4. Locate the fuel mixture tab (Fig. C) Using the tool supplied, carefully turn mixture tabs clockwise until they seat, turn out 2 turns or where you find your best idle.
