STAGE ONE INSTRUCTIONS

1. Remove the vacuum slides from the carbs. Remove the stock needles and spacers, noting the order of assembly (Fig. A). Using the DD #32 drill bit provided, enlarge both slide lift holes (Fig. A). Do not drill the needle hole.

2. Install the Dynojet needles on groove #2. Use all stock spacers (Fig. A). Install the small Dynojet washers above the e-clip. After installing the slides in the carbs be sure to check slide movement manually.

3. Install the Dynojet main jets provided. If you are running the stock exhaust install the DJ112 main jets. If you are running an aftermarket exhaust or slip-on with a high flowing baffle, use the DJ116 main jets. Be sure that the jets you are changing are the main jets.

4. Locate the fuel mixture plug (Fig. B). If you see a screw head at Fig. B proceed to adjusting procedure. With the DD #5/32 drill bit provided carefully drill through the plugs. NOTE: The mixture screw is directly underneath this plug, be ready to pull back on the drill the instant you break through. Use screw provided to secure and remove this plug. Carefully turn mixture screws clockwise until lightly seated, then back out 2-1/2 turns.

STAGE THREE INSTRUCTIONS

1. Remove the vacuum slides from the carbs. Remove the stock needles and spacers, noting the order of assembly (Fig. A). Using the DD #32 drill bit provided, enlarge both slide lift holes (Fig. A). Do not drill the needle hole.

2. Install the Dynojet needles on groove #2. Use all stock spacers (Fig. A). Install the small Dynojet washers above the e-clip. After installing the slides in the carbs be sure to check slide movement manually.

3. Install the Dynojet main jets provided. If you are running the stock exhaust install the DJ150 main jets. If you are running an aftermarket exhaust or slip-on with a high flowing baffle, use the DJ160 main jets. Be sure that the jets you are changing are the main jets.

4. Locate the fuel mixture plug (Fig. B). If you see a screw head at Fig. B proceed to adjusting procedure. With the DD #5/32 drill bit provided carefully drill through the plugs. NOTE: The mixture screw is directly underneath this plug, be ready to pull back on the drill the instant you break through. Use screw provided to secure and remove this plug. Carefully turn mixture screws clockwise until lightly seated, then back out 2-1/2 turns.
