

PVCX AND PV3 TUNE LICENSING

MUST USE POWER CORE SOFTWARE VERSION 1.12 OR NEWER

Open PowerCore software and open C3 application. Go to Tools – Power Vision Licensing

The fields will be populated with data if the file is correct. Click on Create License

Choose which device you are connected to. For PVCX and PV3 click on New Devices

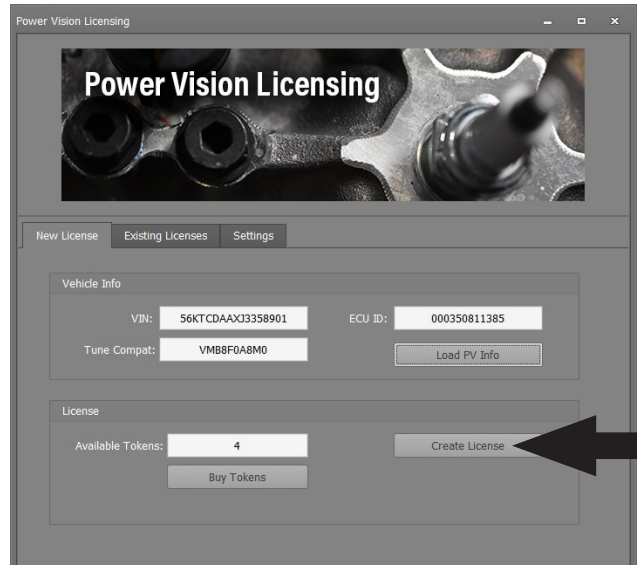

Log into your account.

If you do NOT already have an account click Settings – Create an account and follow the instructions.

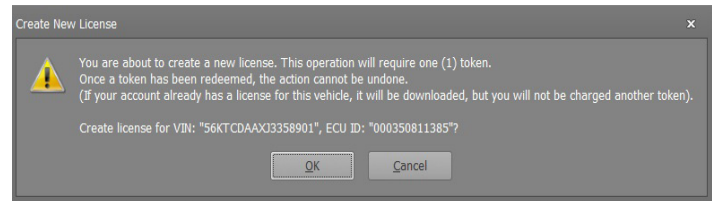

There must be tokens in the account. You can verify this in the Available Tokens box on the bottom left.

Once an account has been established click on Load PV Info

For this to function the PV_Info file must have been created while connected to the vehicle that you want to create the license for. The Ignition MUST be ON.

You can verify that the vehicle VIN # and ECU ID are correct. Click OK.

If you use Windows File Explorer and browse the POWERVISION drive you can see the license is saved to the device and ready to be used.

If you should delete this license file from the device by accident you can access it by going into the Existing License tab in the software and reapplying it.
